

My City – Intercultural City

My City – Intercultural City

My City – Intercultural City workshop provided the opportunity for young people of Mostar to answer on numerous culture and interculturality related issues through socializing and working together on an interesting idea.

My City – Intercultural City was implemented through the Balkan Regional Platform for Youth Participation and Dialogue project, co-funded by EU, with the aim of awareness raising among young people on culture and interculturality starting from their own communities and with their own peers.

The workshop activities were implemented by the Centar ADA Mostar through CityLab program, and organized by Agencija lokalne demokratije Mostar.

... 9 special postcards with the imaginary city streets names were created within the workshop and each of them carries one powerful message...
